

## Barry Kay Award Winners 2020

Category	Poster	Presenter	Title	Judge Comments
<b>Paediatric Clinical</b> <b>WINNER</b>	P.065	F. Johnson	Transplant associated allergy: a comparison of the clinical phenotype and risk factors between paediatric cardiac and renal transplant recipients	This was an exciting and interesting poster and I very much enjoyed hearing about this project. Please could the presenter slow down a little from a “gallop” this is interesting work and we all want to hear about it. I would be very interested to hear more about this work and to see some of this in print with some more of the blood work and T cells investigations. Well done.
<b>Allied Health</b> <b>WINNER</b>	O.07	R. Gourgey	Preventing peanut allergy in East London - Audit of early peanut introduction amongst high risk infants at The Royal London Hospital	It is reassuring to hear that such a high number of people are following your advice! Also a relevant finding about taste as a limitation to guide further resource development.
<b>Adult Clinical</b> <b>WINNER</b>	O.05	K. Sooriyakumar	Mapping outcomes of supervised open food challenges to a clinical risk stratification model in a specialist UK regional allergy service	The issue presented is very important and high-quality research on it has the potential to change our practice. The poster is well-made and to-the-point, with use of graphs and tables.
<b>Primary Care</b> <b>WINNER</b>	P.078	M. Kelman	Development and implementation of a nurse-led allergy clinic model in primary care: a feasibility study	Important subject well presented and will have high impact. Excellent audio presentation, clear detail and a large amount of information was covered- referral criteria, feedback from questions and outcomes. It would be interesting to hear of any challenges the clinic faced, and areas others could learn from.
<b>Undergraduate</b> <b>WINNER</b>	O.08	V. Kaminskaite	Validation of blinded recipes in children for use in double-blind placebo-controlled food challenges with egg, peanut and milk	Presentation was very clear and engaging, with good understanding of method and good choice of content visually. This has clear applicability- well done!
