

STANDARDS OF CARE COMMITTEE (SOCC)

Expression of interest: Writing Group Membership

Clinical Practice Statement on best practice, governance and leadership of allergy alert coding on electronic patient records for food, drug and non-drug allergy.

Allergy alert coding is everybody's business. The BSACI Standards of Care Committee are compiling a Clinical Practice Statement on best practice, governance and leadership of allergy alert coding on electronic patient records for food, drug and non-drug allergy.

This work will address allergy alert coding used to flag patients' known allergies to clinicians. It will not address diagnostic and procedure coding for allergic conditions.

The clinical practice statement has been proposed by Dr Claudia Gore.

We are inviting those interested in being involved to join the writing group. In this role the individual will work with the appointed writing group lead and the SOCC core and advisory committee to develop this Clinical Practice Statement following the guidance set out in the BSACI manual.

Any member who feels that they have the requisite expertise and background in this area, and who would like to work with SOCC in developing this clinical practice statement is invited to submit an application (maximum of 1500 words) and a short CV to maria.smith@bsaci.org by **20th October 2025**. All applicants will be required to complete and return with their application the attached BSACI '[Declarations of Interests](#)' form using the BSACI Conflict of Interest Policy.

Best wishes,

Dr Sue Leech & Dr Isabel Skypala

SOCC Co-Chairs
